

Lincoln Electric's CheckPoint™ Production Monitoring Software Delivers Key Weld Performance Information Anywhere, Anytime

Cleveland – As the welding industry's only “always-on” worldwide production monitoring network, [Lincoln Electric's CheckPoint™](#) enables users to obtain performance information on their Lincoln Electric welders and welding operations wherever they are, from any computer and almost any mobile device, without the need to install, purchase or maintain specialized software or IT hardware. Critical alerts and production visibility are available at the user's fingertips, whenever and wherever they want, thanks to the CheckPoint™ permanent, secure data connection in the “cloud.”

Key features of CheckPoint™ Production Monitoring include:

- Accessibility from almost any mobile device, including many smart phones and tablets, or any personal computer through any web browser, 24 hours a day, 7 days a week, 365 days a year
- Ability to view live status of each welder and analyze WeldScore™, weld details, wire-feed speed, voltage, True Energy™ and more
- No software to buy, install or upgrade and no special IT hardware required – just login with a unique user name and password and start tracking performance
- Easily personalized and configurable layout, with only a click of a mouse
- Captures audit trail data to satisfy reporting requirements for such quality programs as ISO, Six Sigma, statistical process control (SPC), quality cost delivery (QCD), overall effectiveness (OEE) and lean manufacturing

For more on Lincoln Electric's CheckPoint™ Production Monitoring network, call (888) 355-3213 or visit www.lincolnelectric.com to obtain bulletin S2.32.

The Lincoln Electric Company, headquartered in Cleveland, Ohio, is the world leader in the design, development and manufacture of arc welding products, robotic arc welding systems, fume control systems, plasma and oxyfuel cutting equipment and has a leading global position in the brazing and soldering alloys market.
